MR. ECKARD CRAUSE  
NAMBALA PROJECT  
FRIENDS SUPPORT FOR COMMUNITY DEVELOPMENT

## RE: WORD OF THANKS.

Dear Mr E. Crause, Much greetings from me and the entire Council of Arusha, Arumeru District to you and your family.

I should thank you and the organization for giving me the invitation so that we can share this moment together, to you and the whole members again **THANK YOU!**

I understand your efforts in supporting our people, and this is obvious to us all, we have nothing in return but to pray to you so that God gives you good health your family and the rest of your members.

Mr Crause it is my sincere hope that your stay has been so wonderful and your colleagues/family here. This place has friendly people and inviting atmosphere. These means that you are the ambassador to your country about this place.

I understand the support you are trying to offer across the community and the entire health sector.

The government of Tanzania through decentralization and sector wide approaches has achieved many important milestones in its endeavor to improve health services for her people. This has been achieved by involving partners in the health sector.

With this same perspective, I take this opportunity to say that our Council shall be gratefully to work hand in hand with you.

We are currently establishing a new District Hospital along Ngaramtoni area, so far we have achieved to complete a modern operating theatre through the support from our friend from German too.

This hospital will be catering about six hundred thousand or more people from Arumeru and neighboring Districts every year.

There is a room for attachment of various students from you and your country who may wish to experience the tropical disease management as well as exploring many more opportunities of research and other related fields.

At the moment we are still looking for partners like you who we will work together in making this happen. That this District Hospital becomes an exemplary District Hospital in the Country.

It is my sincere hope this day marks in history the beginning of mutual collaboration between you and the Council.

I personally, am promising to co- operate with you fully in the event you think I need to do so.

We have various projects ahead which we think we will share with you in the near future and see whether we can collaboratively, work together.

Lastly, may I again thank you all who have participated in one way or another for their exemplary work that enabled this to happen.

May I wish you all a safe and comfortable trip back home and if God wishes we will see each other again whether here or anywhere.

To all I am grateful,

Dr. Tobias Mkina
